INDEX TO VOLUME XVII.

[NOTE.—In this index the titles of principal papers and the headings of departments, as *Discussion*, are in italics.]

Abriss der Lehre von den Erzlagerstätten (review), 505
Accumulation, of oil and folding, 200; of petroleum, 258
Accumulation of oil in southwestern Oklahoma, Some structural factors in (Howell), 15
Adirondack magnetic iron ores, The sedimentary phases of the (Nason), 633; discussion, 709
Adularia, formation, 110
Albert, R., on human acid, 422
Albite diorite, fresh and altered, analyses, 364, 366
Algal structures, 411
Alkali metasomatism, 109
Aimeria iron ores, 602, 611
Altai region, rocks and ore deposits, 264
Alteration, Adirondack gabbros, 634; at Mount Bischoff, 172; in Arkansas peridotite, 669; in rocks of Telluride district, 682; of augite diorite, 361; of precious stones, 596; primary willemite, 545
Alteration, superficial, of ore deposits, An effect of climatic change on the (Knox), 655
Amarillo Hills, 249
Amphibolites, 636
Analyses—albite diorite, fresh and altered, 364; augite diorite, fresh and altered, 362; chert, 618; clay, residual, 618; crude oils, East Borneo, 333; dolomite, 618; franklinite, 548; granodiorite, fresh and altered, 363; iron ores, 603, 612, 618; peridotite, 669; sericitized rock, 684; water from Amazon River and tributaries, 454
Analysis of structure below an unconformity (Mertie), 572
Ancestral Rocky Mountains, 249
Andesite porphyry, 77
Andree, K., on formation of glauconite, 417
Andrews, E. C., *Notes on the geology of the Broken Hill district*, 470–490
Anhydrite in Gulf coast salt domes, 141
Ankerite, 501
Anorthosites, 636
Anthophyllite schists, derivation, 108
Apparatus for oil experimentation, 277, 462; for solution of minerals by peat waters, 425
Applied colloid chemistry (review), 717
Arbuckle mountains, geology, 15, 21
Areal foliation, 647
Ardmore basin, Oklahoma, 23
Armstrong, P., communication by, 219; review by, 304
Arsenopyrite, 183
Augite diorite, 360; fresh and altered, analyses, 362
Aurin, Fritz, on the red beds of Oklahoma, 24
Aurin, F. L., Clark, G. C., and Trager, E. A., on pre-Pennsylvanian stratigraphy of the Mid-Continent fields, 240

Ball, S. H., *The geologic and geographic occurrence of precious stones*, 575–601
Ballarat gold fields, 53
Bancroft, W. D., review of book by, 717
Baraboo, 236
Barite, 203
Barton, D. C., discussion by, 141
Bartram, J. G., and Roark, Louis, on the Healdton oil field, 244
Bastin, E. S., review by, 619; on gem-bearing pegmatites of Maine, 589; on silver ore from Neihart, 382
Bastin, E. S., and Laney, F. B., on replacement, 698
Bateman, A. M., *Croppings of ore deposits*, 703–708; *Economic geologists and literature*, 214–215; *Industrial companies and publication*, 295–296; on rocks of Bridge River district, 361
Bayley, W. S., reviews by, 146, 306, 719
Beal, C. H., on the Cushing oil field, 243

INDEX TO VOLUME XVII.

[NOTE.—In this index the titles of principal papers and the headings of departments, as *Discussion*, are in italics.]

Abriss der Lehre von den Erzlagerstätten (review), 505
Accumulation, of oil and folding, 200; of petroleum, 258
Accumulation of oil in southwestern Oklahoma, Some structural factors in (Howell), 15
Adirondack magnetic iron ores, The sedimentary phases of the (Nason), 633; discussion, 709
Adularia, formation, 110
Albert, R., on human acid, 422
Albite diorite, fresh and altered, analyses, 364, 366
Algal structures, 411
Alkali metasomatism, 109
Aimeria iron ores, 602, 611
Altai region, rocks and ore deposits, 264
Alteration, Adirondack gabbros, 634; at Mount Bischoff, 172; in Arkansas peridotite, 669; in rocks of Telluride district, 682; of augite diorite, 361; of precious stones, 596; primary willemite, 545
Alteration, superficial, of ore deposits, An effect of climatic change on the (Knox), 655
Amarillo Hills, 249
Amphibolites, 636
Analyses—albite diorite, fresh and altered, 364; augite diorite, fresh and altered, 362; chert, 618; clay, residual, 618; crude oils, East Borneo, 333; dolomite, 618; franklinite, 548; granodiorite, fresh and altered, 363; iron ores, 603, 612, 618; peridotite, 669; sericitized rock, 684; water from Amazon River and tributaries, 454
Analysis of structure below an unconformity (Mertie), 572
Ancestral Rocky Mountains, 249
Andesite porphyry, 77
Andree, K., on formation of glauconite, 417
Andrews, E. C., *Notes on the geology of the Broken Hill district*, 470–490
Anhydrite in Gulf coast salt domes, 141
Ankerite, 501
Anorthosites, 636
Anthophyllite schists, derivation, 108
Apparatus for oil experimentation, 277, 462; for solution of minerals by peat waters, 425
Applied colloid chemistry (review), 717
Arbuckle mountains, geology, 15, 21
Areal foliation, 647
Ardmore basin, Oklahoma, 23
Armstrong, P., communication by, 219; review by, 304
Arsenopyrite, 183
Augite diorite, 360; fresh and altered, analyses, 362
Aurin, Fritz, on the red beds of Oklahoma, 24
Aurin, F. L., Clark, G. C., and Trager, E. A., on pre-Pennsylvanian stratigraphy of the Mid-Continent fields, 240

Ball, S. H., *The geologic and geographic occurrence of precious stones*, 575–601
Ballarat gold fields, 53
Bancroft, W. D., review of book by, 717
Baraboo, 236
Barite, 203
Barton, D. C., discussion by, 141
Bartram, J. G., and Roark, Louis, on the Healdton oil field, 244
Bastin, E. S., review by, 619; on gem-bearing pegmatites of Maine, 589; on silver ore from Neihart, 382
Bastin, E. S., and Laney, F. B., on replacement, 698
Bateman, A. M., *Croppings of ore deposits*, 703–708; *Economic geologists and literature*, 214–215; *Industrial companies and publication*, 295–296; on rocks of Bridge River district, 361
Bayley, W. S., reviews by, 146, 306, 719
Beal, C. H., on the Cushing oil field, 243

Beauhart Mine, 646
Beck, R., and Berg, G., review of book by, 505
Becke, F., on the formation of biotite, 111; on the formation of myrmekite, 110
Bendigo gold fields, 49
Benson Mine, 650
Bell, J. M., on silver occurrences in Ontario, 655
Berger, W. R., on the Sallyards oil fields, 255
Bibliography of metasomatism in silicate rocks, 123; of petroleum in Borneo, 347
Bilbao, Almeria, and Santander iron ores, Origin of the (van der Veen), 602
Bilbao iron ores, 602
Biotite schist from gabbro, 635
Biwabik formation, 409; origin, 446
Blackwelder, Eliot, discussion by, 217; on the origin of central Kansas oil domes, 256
Bleeck, W. G., on Burmese jadeite, 596
Blum, Anthony, review of book by, 719
Bonine, C. A., discussion by, 389
Borneo, Petroleum in (Redfield), 313
Bowen, N. L., on derivation of igneous rocks, 354; on formation of albite, 366
Bowen, W. C., with Ries, H., *Origin of the zinc ores of Sussex County, N. J.*, 517–571
Boydell, H. C., *Some etching tests on pyrrhotite*, 491–497
Braden Copper Company, mining operations, 98
Braden explosive vent, formation, 81
Braden mine, geology, 498
Braden mine, Rancagua, Chile, The geology of (Lindgren and Bastin), 75
Braden tuffs, 93
Bradley, W. H., review by, 145
Branner, J. C., on the decay of rocks, 453
Branner, J. C., and Brackett, R. N., on the peridotite of Pike County, Arkansas, 663
Breccia, volcanic, 669
Bridge River district, 350
Bridge River series, 353
British Borneo, 316; oil district, 339
Brögger, W. C., on fenite, 112
Broken Hill district, Notes on the geology of the (Andrews), 470
Brôken Hill lode, structure, 484; age, 490
Broken Hill series, 475
Brown, R. G., on ore deposits at Butte, 656
Brown, T. C., on oölites, 413
Brown Face, Mount Bischoff, 161
Bucher, W. H., on oölites, 414
Buoyancy, effect on oil migration, 290
Buried hills and ridges in Mid-Continent region, 233
Buried topography, effect on overlying sediments, 252
Burton, C. E., on the red beds of Oklahoma, 24
Buttram, Frank, on the Cushing oil field, 243
Byram gneiss, 524

Cadwallader series, 353
Californian petroleum, Phosphorus in (Palmer), 100
Campbell, J. M., discussion by, 139; on laterite, 453
Cameron, F. K., and Bell, J. M., on soil solution, 431
Capillarity, 287
Carbon metasomatism, 116
Carbonated water as solvent of iron, 433
Cassiterization at Mount Bischoff, 176
Cayeux, L., on organic remains in Huronian rocks, 417
Cement fold, Oklahoma, 22
Cement oil pool, Oklahoma, 31
Centrifugal replacement, 694, 699
Centripetal replacement, 694, 698
Cerro Negro series, 77
Chalcocite, 560
Chalcocite enrichment, 93
Chalcopyrite, 185, 560, 691
Chamberlin, R. T., review by, 222; on the Ancestral Rocky Mountains, 249
Chamosite, 416
Charts for solution of dip and strike problems, 211
Cheever Mine, 644
Chemical analyses (*see* Analyses)
Chert, association with lavas, 447; of the Mesabi Range, 418
Chert concretion in dolomite, showing radial structure, 614
Chlorite, 182
Chrysocolla, 97
Cinnabar, 114

Clarke, F. W., on iron in natural waters, 421
Classification of metasomatic processes, 108; of mineral deposits, 292; of Telbess iron ores, 267
Cliftonite, 599
Climatic variations, 660
Coal catalogue combined with coal field directory (review), 397
Coal resources, South Africa, 131
Coast Mountains batholith, 354
Cobalt tillite, 298
Coffin, R. C., and others, review of book by, 506
Coleman, A. P., discussion by, 297
Collet, L. W., and Lee, G. W., on formation of glauconite, 417
Collins, J. H., on some Cornish tinstones, 174
Colloids, protective, 441
Comanche oil pool, Oklahoma, 29
Concretion in dolomite, showing radial structure, 614
Condensation of sediments, 256
Connor, M. F., analyses by, 362
Contact phenomena, 527
Coomaroswanny, A. K., on Sinhalese gems, 592
Copper, native, 560
Copper deposits of the Seven Devils and adjacent districts (review), 145
Copper deposits of South America, 75
Coto de Beires iron ore, 612
Coulisse, 322
Criner Hills, Oklahoma, 22
Crook, T., on classification of mineral deposits, 292
Croppings of ore deposits (Bateman), 703
Cross, W., on the color of topaz, 598; on the geology of the Telluride quadrangle, 677
Cross-sections, Braden "crater," 84; Granite ridge of Kansas, 238; southwestern Oklahoma, structure, 20; through Mesabi range, 8
Croydon granites, origin, 57
Cruce oil pool, Oklahoma, 30
Cuprite, 97
Cushing oil field, 243

Dalton, W. H., on determination of dip, 207
Daly, R. A., on rocks of Coast Mountains, 354
Damourite, 179
Dane, C. H., review by, 716
Dean, R. S., on dialyzed silica, 442
Decaying organic matter as solvent, 422
De Golyer, E., *On the estimating of petroleum reserves*, 40–45
Deposition of gold, 54
Depth, relation to proportion of oil and gas, 32; (and height) of strata, determination of, 374
Derby, O. A., on the decay of rocks, 453
Determination of dip and strike (Smith), 207
Determination of the thickness and depth of strata, General formulæ for (Price), 370
Diagrams, alteration of albite diorite, 366; of augite diorite, 361; of granodiorite, 365; precipitation of iron solutions, 438; relative production of precious stones, 576, 579; sources of precious stones, 581
Diamond drill holes, logs, 641, 644
Diamond-bearing peridotite in Pike County, Arkansas (Miser and Ross), 662
Diamonds, 586, 594; Arkansas, 667, 672
Dienert, M. F., on precipitation of silica, 442
Diffusion, 608
Dikes, Franklin, N. J., 533
Dip and strike, The determination of (Smith), 207
Discussion and informal communications—
Estimation of petroleum reserves (Veatch), 132
A field method of reducing maps to scale (Armstrong), 219
Geology of the Braden mine (Marsh), 498
Moving underground water in the accumulation of oil and gas (Blackwelder), 217
Nason on "the sedimentary phases of the Adirondack magnetic iron ores" (Miller), 709
Occurrence of gypsum in the Gulf coast salt domes (Barton), 141
The origin of graphite (Jensen), 55; (Tilley), 218
Paragenesis of martite and magnetite of Mesabi range (Newland), 299
The profession of ore hunting (Campbell), 139
Some notes on iron-depositing bacteria (North), 392
Underground water in migra-

tion and accumulation of oil and gas (Bonine), 389
The veins of Cobalt, Ontario (Coleman), 297
The zonal distribution of ores (Stillwell), 46
Dodd, H. V., *Some preliminary experiments on the migration of oil up low-angle dips*, 274–291
Dolomite, 609
Drake, N. F., on the Spavinaw granite, 244
Drill record from Mesabi range, 4
Duncan arch, Oklahoma, 22
DuParc, L., on beryl, 588
Dutch Borneo, 316
Dynamometamorphic deposits, 294

Eaton, Arthur, on buried granite in New Mexico, 251
Economic aspects of geology (review), 60
Economic Geologists, The Society of: its sphere and its future (Penrose), 124
Economic geologists and literature (Bateman), 214
Economic geology of the Mount Bischoff tin deposits (Weston-Dunn), 153
Economics of petroleum (review), 225
Editorial—
Croppings of ore deposits (Bateman), 703
Economic geologists and literature (Bateman), 214
Industrial companies and publication (Bateman), 295
On the estimating of petroleum reserves (De Golyer), 40
Some present day aspects of the mining industry in South Africa (Mellor), 128
Effect of climatic change on the superficial alteration of ore deposits (Knox), 655
Eldorado series, 353
Electrical prospecting, 623
Ellis, D., on iron bacteria, 457
Emanation mineral deposits, 293
Emmons, S. F., and Cross, W., on rock alteration at Silver Cliff, 686
Emmons, W. H., review by, 714; review of book by, 395; on alteration of limonite, 12; on mineral waters in sulphide ores, 657; on zonal distribution of ores, 48
Empire oil pool, Oklahoma, 29
Emulsion, 288
Enrichment in Neihart district, 383; in the Braden mine, 498; supergene, 696
Epithermal mineral deposits 292
Eskola, P., on magnesia metamorphism, 112
Estimation of petroleum reserves (discussion), 132
Etch surface of pyrrhotite, 493
Etching tests on pyrrhotite (Boydell), 491
Experimental study of the invasion of oil into a water-wet sand (Skirvin), 461
Experiments on replacement of calcite and silica by iron, 440; with peat solutions, 423
Experiments on the migration of oil up low-angle dips, Some preliminary (Dodd), 274
Exudation veins, 293

"Far East" region, rocks and ore deposits, 271
Fath, A. E., on Osage County folds, 196; on the belt of faults in Oklahoma and Kansas, 256
Faulting, Borneo, 324; Mount Bischoff, 160
Feldspar, formation, 110
Feldspathization, process, 118
Fenite, 112
Ferguson, H. G., on ore deposits of the Allegheny district, 358
Feuchtwanger, L., on the occurrence of gems, 579
Field method of reducing maps to scale, 219
Fissuring, Telluride district, 679
Fluorine-chlorine-boron metasomatism, 114
Fluorite, 183
Folding, cause of, 196
Folds of the Mid-Continent oil fields, 194, 252
Foliation, areal, 647
Ford, W. E., review by, 624; on beryl, 588
Formulæ for the determination of thickness and depth of strata, 370
Fort Ring oil pool, Oklahoma, 29
Fox oil pool, Oklahoma, 29
Franklin limestone, 520
Franklin ore body, 536
Franklin zinc mine, 518
Franklinite, 539, 547
Fuller, J. T., on diamonds in Arkansas, 663

Gabbros, Adirondacks, 634
Galena, 559
Garber field, Oklahoma, 198
Gardner, J. H., on the vertical component in local folding, 254
Garnet, 218, 554, 595
Garnierite, 113
Gas, southwestern Oklahoma, 31
Geijer, P., on replacement of lime by soda, 111
Geikie, A., on radiolarian cherts, 447
Gels and crystals, relation, 617
General economic geology (review), 395
General formulæ for the determination of the thickness and depth of strata (Price), 370
Genesis of iron ores of Bilbao, 604
Geographic occurrence of precious stones, The geologic and (Ball), 575
Geographical distribution of gem localities, 577
Geologic and geographic occurrence of precious stones (Ball), 575
Geologic history of the Braden mine, 77
Geologic maps—Borneo, 321; Braden mine, Chile, 87; Pike County, Arkansas, 665; Prairie Creek peridotite area, 668; southwestern Oklahoma, 16; Telluride district, Colorado, 678 (*see also* Maps)
Geologic occurrence of gems, 580
Geology of Borneo, 318; of Bridge River district, British Columbia, 351; of British Borneo, 340; of Kootei oil district, Borneo, 326; of Mesabi Range, 408; of Mount Bischoff tin deposits, 156; of Siberia, 260; of southwestern Oklahoma, 17; of Tarakan district, Dutch Borneo, 335; of Telluride quadrangle, 677; of the Braden mine, 498; of Vizcaya, 602
Geology of the An-shan iron mine district, South Manchuria (review), 714
Geology of the Braden mine, Rancagua, Chile (Lindgren and Bastin), 75
Geology of the British Empire review), 144
Geology of the Broken Hill district, Notes on the (Andrews), 470
Geology of the Corocoro copper district of Bolivia (review), 619
Geology of the principal ore-bearing provinces of Siberia, New aspects of the (Goudkoff), 260
Giblin lode, Mount Bischoff, 170
Gilbertite, 179
Glaciation, pre-Cambrian, in Ontario, 297
Gladys Belle oil pool, Oklahoma, 31
Glauconite, 417
Glenn, L. C., on diamonds in Arkansas, 663; on oil sands at Burkburnett, Texas, 247
Gneisses, 639
Gold in Victoria, 49; nuggety, 52; Telluride district, 688, 694

Test for gabbro derivatives, 638
Tetrahedrite, 687, 691
Textbook of geology (review), 222
Thenard, P., on silico-azo humic acids, 422
Thermal spring in Bolivia, A recent deposit of a (Lindgren), 201
Thickness of strata, determination of, 374
Thiel, G. A., on oil accumulation, 275
Thomas oil sand, 28
Tilley, C. E., discussion by, 218
Tin deposits, Mount Bischoff, Tasmania, The economic geology of (Weston-Dunn), 153
Tin resources of the British Empire (review), 62
Tin-wolfram deposits, Broken Hill district, 481
Titaniferous iron ores, 635
Titanium-free magnetite deposits of Adirondacks, extent, 649
Topaz, 587, 598
Topazization at Mount Bischoff, 174
Topography, buried, effect on overlying sediments, 252
Torrowangee series, 475
Torrowangee tillite, 490
Torsional faulting, 255
Tourmalines, 589
Tourmalinization, 89; at Mount Bischoff, 175
Trend of axes of folds of Oklahoma oil pools, 195
Troostite, 539
Tufa, 202
Tungsten in a spring deposit, Bolivia, 203
Turner, H. W., on occurrence of albite rocks, 367
Turquoise, 596
Twelvetrees, W. N., on Mount Bischoff tin deposits, 155
Twenhofel, W. H., on granite boulders in Kansas, 240
Two-Four oil pool, Oklahoma, 29

Udden, J. A., on sound ranging, 258
Uncia tin mines, Bolivia, 201
Unconformities, 572
Underground electrical prospecting, 623
Ussuri region, ore deposits, 271

Van der Veen, R. W., *Origin of the Bilbao, Almeria, and Santander iron ores*, 602-618
Van Hise, C. R., and Leith, C. K., on the origin of Lake Superior iron ores, 446
Vassar, H. E., analysis by, 684
Vaughan, T. W., on oölites, 413
Veatch, A. C., discussion by, 132
Veins of Bridge River district, 368; of Telluride district, 679
Velma oil pool, Oklahoma, 30
Ventura emulsion, 103
Victorian gold occurrences, 48
Vogt, Th., on sulphur metasomatism, 115
Von Groddeck, A., on Mount Bischoff tin deposits, 155

Vulcanism, San Juan region, 678

Wagner, P. A., on South African peridotites, 671; on wind concentration of diamonds, 594
Walcott, C. D., on organic life in Huronian time, 417
Walters oil pool, Oklahoma, 29
Ward, L. K., on Mount Bischoff geology, 156
Waring, G. A., on gem-bearing pegmatites of California, 588
Warren, C. H., review of book by, 716
Washburne, C. W., review by, 225
Washita syncline, Oklahoma, 23
Water and carbon dioxide metasomatism, 115
Weathering and denudation at Mount Bischoff, 186
Weathering as the source of iron, 452; in gem mining, 599
Weed, W. H., on the Neihart district, Montana, 382, 386
Weimarn, P. P. von, on the size of crystals, 616
Well logs of Oklahoma, 194
Wells, R. C., review by, 623
West Walters oil pool, Oklahoma, 30
Weston-Dunn, J. G., *The economic geology of the Mount Bischoff tin deposits*, Tasmania, 153–193
Wethered, E. B., on the formation of oölite, 413
Wheal Face, Mount Bischoff, 169
Wheeler oil pool, Oklahoma, 31
Wherry, E. T., review by, 303
White Cliffs series, 475
White Face, Mount Bischoff, 165
Wichita Mountains, 248; geology, 15, 20
Willemite, 539, 542
Willis, Bailey, on the terms positive and negative, 236
Willyama series, 475
Wilson oil sand, 29
Winchell, H. V., on the origin of the Biwabik iron ore, 446
Winchell, N. H., on the origin of the Biwabik iron ore, 446
Winkler granite well, 242
Wintle, S. H., on Mount Bischoff tin deposits, 154
Witwatersrand gold field, 128
Wolff, J. E., on Franklin zinc ores, 563
Wolff, J. F., on magnetites of Mesabi range, 1; on the Biwabik formation, 409; on the origin of Lake Superior iron ores, 447
Wood's Vein, South Lorrain, 656
Wrather, W. E., on the Petrolia fold, 246
Wright, F. E., on a dip chart, 211; on a geological protractor, 213

Zinc ores of Sussex County, N. J., Origin of the (Ries and Bowen), 517
Zincite, 539, 550
Zonal distribution of ores, 46, 656
Zsigmondy, R., on silica solutions, 442
Zypsie oil sand, 29
